ANDoc Table And Media Editing Fixture

This controlled source proves that an agent can update one semantic table cell while a human updates media metadata in the same canonical document.

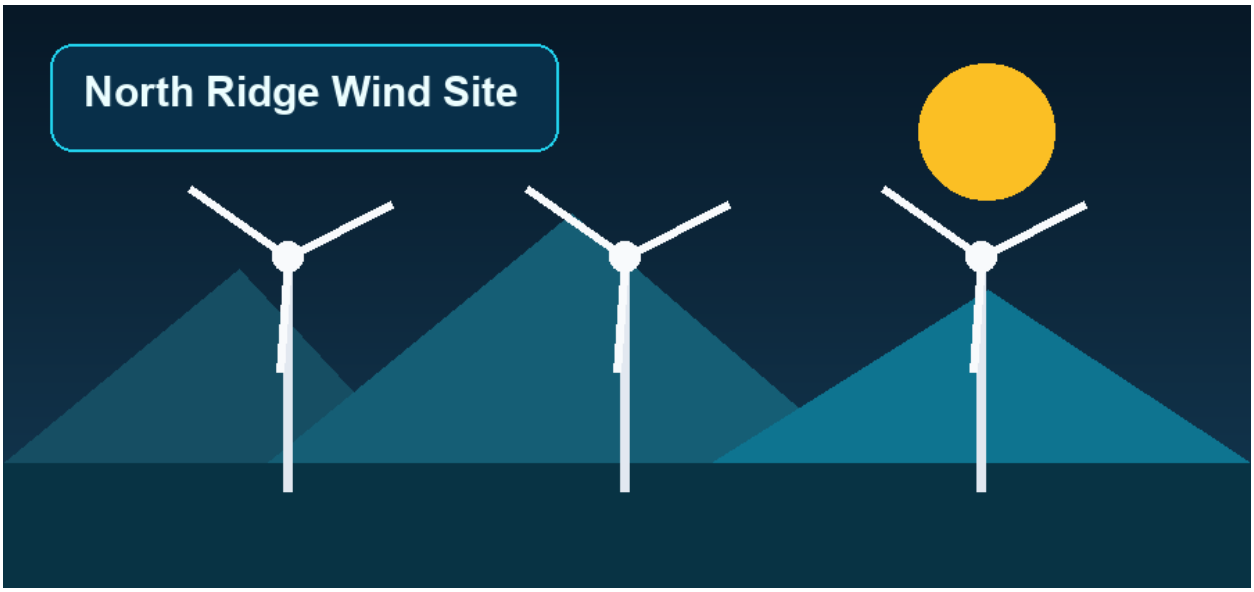

Figure 1. North Ridge wind generation site before human metadata review.

Generation Chart

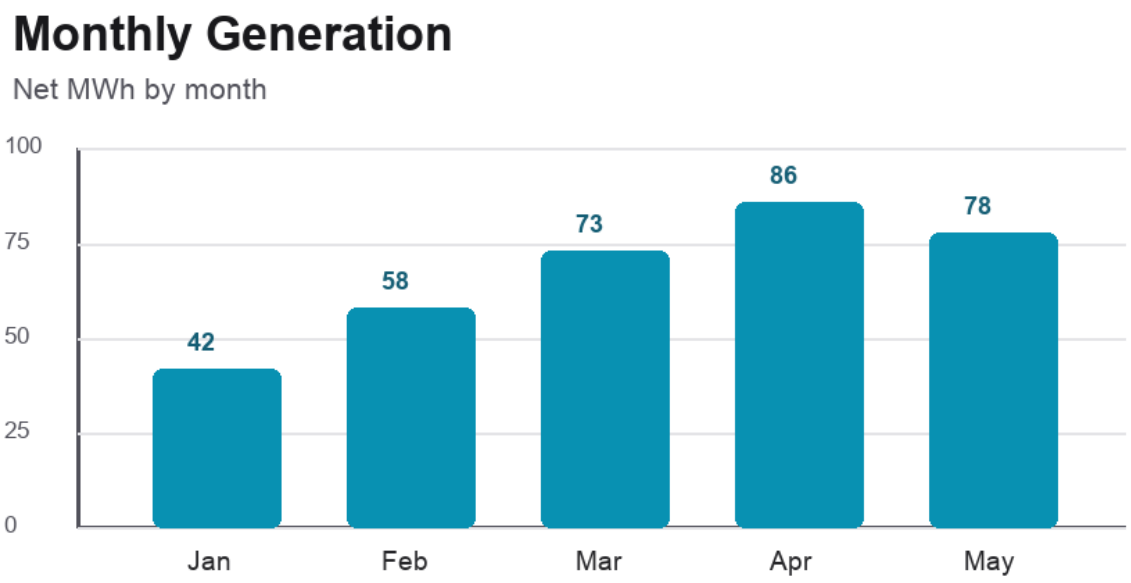

Figure 2. Bar chart of monthly net generation in MWh.

The chart retains a visual fallback and a truthful structured-data extraction status.

Operations Review Table

Each cell must have a stable machine address so an agent can update a single value without replacing the table.

Metric	Baseline	Review status
Availability	96.2%	Pending
Net output	412 MW	Pending
Heat rate	10,420 Btu/kWh	Pending

Table 1. Controlled operating metrics for targeted editing.
